

RETRACTION NOTICE

Retraction notice to “Geogrid reinforced road subgrade stabilization design methodology” [Acta Technica Napocensis: Civil Engineering & Architecture, Vol. 55, No.3, pp. 276-285, 2012.]

Mihai Iliescu, Ioan Ratiu

This article has been retracted at the request of the editors.

The article includes content plagiarised from the translation of the German paper written by Meyer and Elias: Meyer, N., Elias, J.M. *Design methods for roads reinforced with multifunctional geogrid composites for subbase stabilization*, The German Conference FSK-Geo, 1999:

One of the condition of submission of a paper, for publication in the journal is that authors declare explicitly that the submitted manuscript (or any part of it) has not been published previously or is not under consideration for publication elsewhere, any illustration, materials, structure or table that has been published elsewhere must be reported/referenced, and copyright permission for reproduction must be obtained. The journal *Acta Technica Napocensis: Civil Engineering & Architecture* recognizes the importance of the integrity and completeness of the published scholarly articles. We believe that any form of plagiarism, academic dishonesty and manipulation of the research materials represents a serious and very severe violation of the international standards in publishing and of the professional ethical codes. We regret that individual authors have compromised the academic record of our journal and apologies are offered to all readers and authors of the journal that this deception was not detected during the submission process.

The authors recognize that they have committed research misconduct in the incriminated paper published in our journal and they profoundly regret what happened. The second author of the paper, Mr. Ioan Ratiu, wishes to admit sole responsibility and to state that his co-author was not aware of his reprobable actions.
